**BLADEX ANNOUNCES IMPROVED PROFITABILITY, WITH PROFIT FOR THE SECOND QUARTER 2022 OF \$23.0 MILLION, OR \$0.63 PER SHARE, AND AN ANNUALIZED RETURN ON EQUITY OF 9.1%**

**PANAMA CITY, REPUBLIC OF PANAMA, August 3, 2022**

**Banco Latinoamericano de Comercio Exterior, S.A.** (NYSE: BLX, “Bladex”, or “the Bank”), a Panama-based multinational bank originally established by the central banks of 23 Latin-American and Caribbean countries to promote foreign trade and economic integration in the Region, today announced its results for the Second Quarter (“2Q22”) and six months (“6M22”) ended June 30, 2022.

The consolidated financial information in this document has been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

## **BUSINESS HIGHLIGHTS**

- Bladex's Profits totaled \$23.0 million for the 2Q22 (+107% QoQ; +63% YoY), reaching \$34.1 million for the first 6M22 (+27% YoY), mostly driven by improved top-line revenues of Net Interest Income ("NII") and a positive trend in fee income, along with lower credit provision requirements in 2Q22, greatly offsetting increased operating expenses.
- NII continued its growth trend of five consecutive quarters, to reach \$32.7 million for 2Q22 (+27% QoQ; +56% YoY), and up 46% to \$58.4 million for the first 6M22, mainly resulting from the effect of higher average net lending rates and volumes. Net Interest Margin ("NIM") increased to 1.54% in 2Q22 (+22 bps QoQ; +27 bps YoY) and 1.43% (+17 bps YoY), on enhanced credit spreads and higher market rates.
- Fees and Commissions, net, totaled \$4.3 million in 2Q22 (+8% QoQ; unchanged YoY) and \$8.2 million for the first 6M22 (+12% YoY), mostly driven by the sustained growth trend performance in fees from the letters of credit business, and recovered loan syndications activity.
- Efficiency Ratio improved to 35% in 2Q22 and 36% in 6M22, as higher revenues more than offset the increase in operating expenses, mostly associated to higher personnel expenses due to the strengthening of the Bank's work force and a new variable compensation structure, and other expenses mostly related to the Bank's strategy implementation.
- The Bank's Credit Portfolio increased 3% QoQ and 33% YoY, to reach a new record level of \$8.7 billion as of June 30, 2022, driven by the Commercial Portfolio's growth trend of eight consecutive quarters, which also resulted in a record level of \$7.6 billion (+4% QoQ; +26% YoY), along with increased credit investment securities to \$1.0 billion (+4% QoQ; +3x YoY), aimed to diversify exposures and complement the Bank's commercial activities.
- Sustained positive trend in Commercial Portfolio's growth reflecting both stronger demand from the Bank's traditional client base, boosted by higher commodity prices and trade flows in the Region, as well as new underlying business and clients.
- Preservation of asset quality, characterized by the high quality of its borrower base. Credit-impaired loans (Non-Performing or "NPLs") remain unchanged at \$11 million or 0.2% of total Loan Portfolio as of June 30, 2022.
- As of June 30, 2022, the total allowance for credit losses represented 0.6% of total Credit Portfolio, and 5.3 times NPL balances. Provisions for credit losses of \$0.8 million in 2Q22 and \$8.9 million in 6M22 were closely tied to the Bank's Credit Portfolio growth, partly offset by lower IFRS 9 Stage 2 exposure and its related allocated provisions.
- Bladex's liquidity position, consisting of cash and due from banks and highly rated corporate debt securities ('A-' or above), stood at \$945 million, or 11% of total assets as of June 30, 2022. The Bank relies on sustained deposit levels and well diversified funding sources with ample access to global debt and capital markets.
- 2Q22 Annualized Return on Average Equity ("ROAE") reached 9.1%, on improved profitability and a more efficient use of capital. As of June 30, 2022, the Bank's Tier 1 Basel III Capital and Regulatory Capital Adequacy Ratios stood at 15.1% and 12.9%, respectively, well above international standards and regulatory minimums.

## **CEO's Comments**

Mr. Jorge Salas, Bladex's Chief Executive Officer said: "We delivered a strong set of operating and financial results, with our credit book maintaining the growth momentum shown in the prior quarter reaching a historical high of \$8.7 billion dollars at quarter-end. At the same time, we continued to expand margins for the fifth consecutive quarter, expanding net income over 60% year-on-year to \$23 million, while maintaining robust asset quality with NPLs at 0% for over two years now.

This good performance reflects the execution of the strategic plan we have been implementing for the last year with active participation of our board of directors, aimed at enhancing Bladex's profitability, long-term sustainability, and stakeholder value creation. In particular, our plan is centered in expanding our customer and product base, extending loan duration and focusing on higher margin sectors and geographies. As we continue to build on our capabilities, we are also benefiting from the current environment of high inflation, tightening of global financial conditions and rising interest rates. In sum, we are building a stronger foundation to capitalize on the competitive advantages of Bladex as a unique and well-positioned trade bank focused on Latin America."

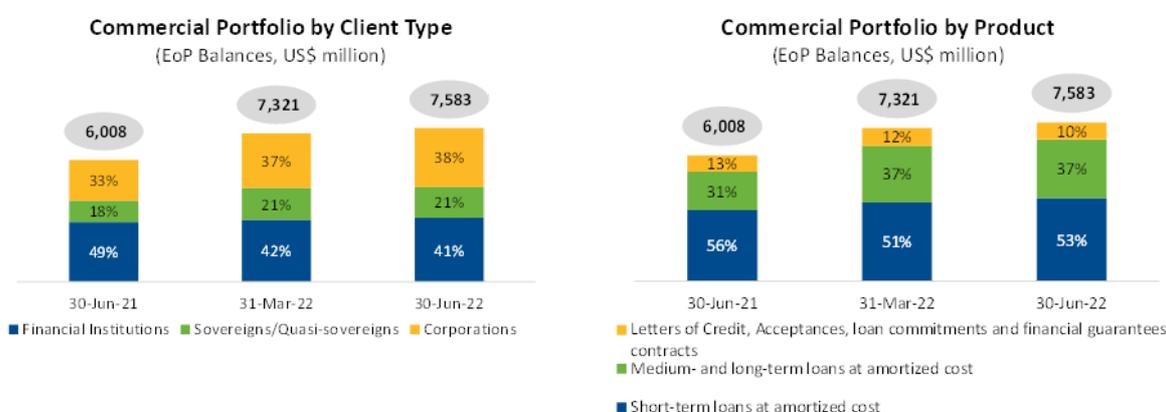

## RESULTS BY BUSINESS SEGMENT

The Bank's activities are managed and executed through two business segments, Commercial and Treasury. Information related to each reportable segment is set out below. Business segment results are based on the Bank's managerial accounting process, which assigns assets, liabilities, revenue, and expense items to each business segment on a systemic basis.

### COMMERCIAL BUSINESS SEGMENT

The Commercial Business Segment encompasses the Bank's core business of financial intermediation and fee generation activities developed to cater to corporations, financial institutions, and investors in Latin America. These activities include the origination of bilateral short-term and medium-term loans, structured and syndicated credits, loan commitments, and financial guarantee contracts such as issued and confirmed letters of credit, stand-by letters of credit, guarantees covering commercial risk, and other assets consisting of customers' liabilities under acceptances.

Profits from the Commercial Business Segment include (i) net interest income from loans; (ii) fees and commissions from the issuance, confirmation and negotiation of letters of credit, guarantees and loan commitments, as well as through loan structuring and syndication activities; (iii) gain on sale of loans generated through loan intermediation activities, such as sales and distribution in the primary market; (iv) gain (loss) on sale of financial instruments measured at FVTPL; (v) reversal (provision) for credit losses, (vi) gain (loss) on non-financial assets; and (vii) direct and allocated operating expenses.

Bladex's Commercial Portfolio maintained its quarterly growth trend, reaching \$7.6 billion at the end of 2Q22, a 4% QoQ increase compared to \$7.3 billion a quarter ago and a 26% YoY increase compared to \$6.0 billion a year ago. On an average basis, Commercial Portfolio balances reached \$7.4 billion for the 2Q22 (+10% QoQ; +22% YoY) and \$7.1 billion for the first 6M22 (+23% YoY). The quarterly increased levels of EoP and average balances reflect both stronger demand from the Bank's traditional client base, boosted by higher commodity prices and trade flows in the Region, as well as new underlying business and clients. In addition, the Bank continued collecting all scheduled loan maturities, evidencing the high quality of the Bank's borrower base and short-term nature of its business.

As of June 30, 2022, 71% of the Commercial Portfolio was scheduled to mature within a year, down 3 pp compared from the previous quarter and down 7 pp from a year ago. Trade finance transactions represented 64% of the short-term origination, down 3 pp compared to a quarter ago and up 2 pp compared to a year ago.

The following graphs illustrate the geographic distribution of the Bank's Commercial Portfolio as of June 30, 2022, highlighting the portfolio's risk diversification by country and across industry segments:

Bladex's credit quality remains sound, with a well-diversified exposure across countries. As of June 30, 2022, 45% of the Commercial Portfolio was geographically distributed in investment grade countries, up 1 pp from the previous quarter and 2 pp from a year ago, still centered on preserving credit quality through well diversified exposures with top-tier clients across the Region. This includes the Bank's classification of Colombia as non-investment grade following downgrades by two main credit rating agencies back in May and July of 2021. Brazil continues to represent the largest country-risk exposure at 16% of the total Commercial Portfolio, of which 67% was with financial institutions. Other relevant country-risk exposures were Colombia at 11% and investment grade countries such as Mexico at 11%, Chile at 9% and top-rated countries outside of Latin America (which relates to transactions carried out in Latin America) at 8% of the total portfolio.

The Commercial Portfolio by industries also remained well-diversified and focused on high quality borrowers, as exposure to the Bank's traditional client base of financial institutions represented 41% of the total Commercial Portfolio, and exposure to sovereign and state-owned corporations accounted for 20% of the total portfolio at the end of 2Q22. The remaining exposure comprises top tier corporates throughout the Region, well diversified across sectors, in which most industries represented 5% or less of the total Commercial Portfolio, except for certain sectors, strategic to the Bank, benefitting from higher commodity prices and LatAm trade flows, such as Oil & Gas (Downstream) at 14%, Electric power at 7%, Food and beverage and Metal manufacturing, each at 6% of the Commercial Portfolio at the end of 2Q22.

Refer to Exhibit IX for additional information related to the Bank's Commercial Portfolio distribution by country, and Exhibit XI for the Bank's distribution of loan disbursements by country.

The Commercial Business Segment's Profit resulted in \$22.4 million for 2Q22 (+70% QoQ; +40% YoY) and \$35.7 million for the first 6M22 (+15% YoY). The quarterly and yearly increases were mostly driven by strong improvement in top-line revenues of NIL, and a positive trend in fee income from letters of credit and syndication businesses, along with lower credit provision requirements in 2Q22, greatly offsetting increased operating expenses, mostly associated to higher personnel expenses due to the strengthening of the Bank's work force and a new variable compensation structure, and other expenses mostly related to strategy implementation. In addition, 6M22 yearly increase was partly offset by higher provisions for credit losses mainly associated to the 26% YoY increase in Commercial Portfolio balances.

## **TREASURY BUSINESS SEGMENT**

The Treasury Business Segment focuses on managing the Bank's investment portfolio and the overall structure of its assets and liabilities to achieve more efficient funding and liquidity positions for the Bank, mitigating the traditional financial risks associated with the balance sheet, such as interest rate, liquidity, price and currency risks. Interest-earning assets managed by the Treasury Business Segment include liquidity positions in cash and cash equivalents, as well as highly liquid corporate debt securities rated 'A-' or above, and financial instruments related to the investment management activities, consisting of securities at fair value through other comprehensive income ("FVOCI") and securities at amortized cost (the "Investment Portfolio"). The Treasury Business Segment also manages the Bank's interest-bearing liabilities, which constitute its funding sources, mainly deposits, short- and long-term borrowings and debt.

Profits from the Treasury Business Segment include net interest income derived from the above-mentioned Treasury assets and liabilities, and related net other income (net results from derivative financial instruments and foreign currency exchange, gain (loss) per financial instruments at fair value through profit or loss ("FVTPL"), gain (loss) on sale of securities at FVOCI, and other income), recovery or impairment loss on financial instruments, and direct and allocated operating expenses.

The Bank's liquid assets, mostly consisting of cash and due from banks, as well as highly rated corporate debt securities ('A-' or above) aimed to enhance liquidity yields, totaled \$945 million at the end of 2Q22, compared to \$782 million a quarter ago and \$999 million a year ago. As of June 30, 2022, \$743 million, or 79% of total liquid assets represented deposits placed with the Federal Reserve Bank of New York, while \$145 million, or 15% of total liquid assets represented corporate debt securities classified as high quality liquid assets ("HQLA") in accordance with the specifications of the Basel Committee. As of the end of 2Q22, 1Q22, and 2Q21, liquidity balances to total assets represented 11%, 9% and 15%, respectively, while the liquidity balances to total deposits ratio was 30%, 24% and 30%, respectively.

The credit investment portfolio, related to the Treasury's investment management activities aimed to diversify exposures and complement the Bank's Commercial Portfolio, increased to \$957 million at the end of 2Q22, a 4% increase compared to \$919 million a quarter ago and almost three times higher compared to \$322 million a year ago. Consequently, the Bank's total Investment Portfolio amounted to \$1,102 million as of June 30, 2022, mostly consisting of readily-quoted U.S., Latin American and Multilateral securities. Refer to Exhibit X for a per-country risk distribution of the Investment Portfolio.

On the funding side, deposit balances were \$3.1 billion at the end of 1Q22, down 4% QoQ and 7% YoY. The sustained and relevant level of the Bank's deposit base is enhanced by its Yankee CD program, which complements the short-term funding structure, combined with the steady support from the Bank's Class A shareholders (i.e.: central banks and their designees), which represented 51% of total deposits at the end of 2Q22, up 2 pp from 49% from the previous quarter and 3 pp from 48% a year ago. As of June 30, 2022, deposits represented 41% of total funding sources, down 4 pp compared to 45% in the previous quarter and 20 pp compared to 61% a year ago. In turn, funding through securities sold under repurchase agreements ("Repos") increased to \$687 million at the end of 2Q22 (+99% QoQ; +511% YoY), while short- and medium-term borrowings and debt totaled \$3.9 billion at the end of 2Q22 (+8% QoQ ; +87% YoY). Weighted average funding costs resulted in 1.66% for 2Q22 (+54 bps QoQ; +73 bps YoY) and 1.40% in the first 6M22 (+39 bps YoY), mostly reflecting the recent increase in market interest rates.

The Treasury Business Segment recorded a \$0.6 million profit for 2Q22 (+128% QoQ; +130% YoY) and a \$1.5 million loss for the first 6M22 (+62% YoY). The 2Q22 profit was mainly driven by increased NII resulting from the effect of higher investment portfolio balances, and the positive effect of increasing market rates and the optimization of liquidity levels. The 6M22 loss was the result of the impact of the \$1.1 million provision for credit losses closely tied to the increase in the credit investment portfolio, and higher operating expenses, partly offset by increased NII.

### NET INTEREST INCOME AND MARGINS

(US\$ million, except percentages)	2Q22	1Q22	2Q21	QoQ (%)	YoY (%)	6M22	6M21	YoY (%)
<b>Net Interest Income</b>

<b>Net Interest Margin ("NIM")</b>								
	1.54 %	1.32 %	1.27 %	17 %	21 %	1.43 %	1.26 %	14 %

NII totaled \$32.7 million for 2Q22 (+27% QoQ; +56% YoY) and \$58.4 million for 6M22 (+46% YoY). The quarterly and yearly increases resulted from the effect of increased average loan volumes (+11% QoQ and +22% YoY for the quarter; +23% YoY for the year) and average credit investments volumes (+30% QoQ and +284% YoY), as well as higher net lending rates (+67 bps QoQ and +103 bps YoY for 2Q22; +60 bps for 6M22), benefitting from enhanced lending spreads, the positive impact of higher market rates and optimized average liquidity level.

### FEES AND COMMISSIONS

Fees and Commissions, net, includes the fee income associated with letters of credit and the fee income derived from loan structuring and syndication activities, together with loan intermediation and distribution activities in the primary market, and other commissions, mostly from other contingent credits, such as guarantees and credit commitments, net of fee expenses.

(US\$ million)	2Q22	1Q22	2Q21	QoQ (%)	YoY (%)	6M22	6M21	YoY (%)
Letters of credit fees	3.5	3.3	3.4	5 %	3 %	6.8	5.9	15 %

Fees and Commissions, net, totaled \$4.3 million in 1Q22 (+8% QoQ; unchanged YoY) and \$8.2 million in 6M22 (+12 YoY). The quarterly and yearly increases were mostly driven by the sustained growth trend performance in fees from the letters of credit business, along with recovered loan syndications activity.

<b>Stage 3 (credit impaired) to Total Credit Portfolio</b>	<b>0 %</b>				

As of June 30, 2022, the total allowance for credit losses increased to \$56.0 million, representing a coverage ratio to the Credit Portfolio of 0.6%, compared to \$55.2 million, or 0.7%, at the end of 2Q21, and compared to \$46.1 million, or 0.7%, at the end of 2Q21. Higher allowance during the quarter was closely tied to provisions for credit losses driven by the Bank's Credit Portfolio continued growth, as balances were up by 3% QoQ and 33% YoY at the end of 2Q22, partly offset by the \$21 million QoQ decrease in IFRS 9 Stage 2 exposure. Overall, the resulting provision for credit losses during the 2Q22 was \$0.8 million.

The Bank maintained its sound asset quality, with credit-impaired loans ("NPL") unchanged at \$11 million, or 0.2% of the total Loan Portfolio as of June 30, 2022. Credits categorized as Stage 2 under IFRS 9 (with increased risk since origination) represented 2% of total credits, down from 4% a year ago, with the remaining 98% categorized as Stage 1 or low-risk credits.

## OPERATING EXPENSES

(US\$ million, except percentages)

	2Q22	1Q22	2Q21	QoQ (%)	YoY (%)	6M22	6M21	YoY (%)

<b>Efficiency Ratio</b>	<b>35.4 %</b>	<b>36.4 %</b>	<b>39.6 %</b>			<b>35.9 %</b>	<b>40.5 %</b>	

The Bank's 2Q22 and 6M22 operating expenses totaled \$13.1 million (+19 QoQ; +29% YoY) and \$24.1 million (+25% YoY) respectively. These increases were mostly associated to higher personnel expenses due to the strengthening of the Bank's work force and a new performance-based variable compensation structure –closely tied to strategy execution and financial performance and returns–, and other expenses mostly related to the Bank's strategy implementation, which includes an evaluation aimed at improving the Bank's processes and technology.

The Bank's Efficiency Ratio improved to 35.4% in 2Q22, compared to 36.4% a quarter ago and compared to 39.6% a year ago, as the 22% QoQ and 44% YoY improvements in total revenues more than offset the increase in operating expenses. YTD Efficiency Ratio stood at 35.9%, down from 40.5% a year ago, as the 41% increase in income generation overcompensated the increase of operating expenses during the year

## CAPITAL RATIOS AND CAPITAL MANAGEMENT

The Bank's equity consists entirely of issued and fully paid ordinary common stock, with 36.3 million common shares outstanding as of June 30, 2022. At the same date, the Bank's ratio of total assets to total equity stood at 8.8 times, and the Bank's Tier 1 Basel III Capital Ratio, in which risk-weighted assets are calculated under the advanced internal ratings-based approach (IRB) for credit risk, decreased to 15.1% due to higher risk-weighted assets on increased Loan and Investment Portfolios, while equity levels remained relatively stable at over \$1 billion. Similarly, the Bank's Capital Adequacy Ratio, as defined by Panama's banking regulator, was 12.9% as of June 30, 2022, well above the regulatory minimum of 8%. Under this methodology, credit risk-weighted assets are calculated under Basel's standardized approach.
